

CSUWN has provided Research Grants to four deserving Masters Level students from Botany & Biology and Environmental Science faculties to undertake their thesis/dissertation work in both the project sites (GLA & KTWR) in 2010. The research topics include:

- Exploring the payment for Ecosystem services in GLA
- Status of the turtles with a focus on the Red crowned Roofed Turtles in GLA
- Assessing the status of critically endangered vulture species in KTWR
- Documenting the contribution of project's livelihoods interventions in improving the household income of Wetland Dependent Communities (WDCs) in KTWR
